Last updated: October 20, 2026

Research Interests

Topics: Public Economics, Environmental Economics, Food Studies
Methods: Applied Econometrics, Machine Learning

Positions

LSE Fellow in Environmental Economics (Postdoctoral Scholar)
Department of Geography and Environment, London School of Economics *01.2025 – Current*

Affiliate
Grantham Research Institute *01.2025 – Current*

Education

University of Paris-Saclay
Ph.D. in Economics, Research Unit: Paris-Saclay Applied Economics (PSAE), INRAE *12.2024*
Supervisor: Stéphane De Cara (PSAE)

Jury: Céline Bonnet (TSE), Jutta Roosen (TUM), Martin O'Connell (Wisconsin-Madison), José de Sousa (Paris-Assas)

Paris School of Economics
M.Sc. Applied Economics (Cum Laude), Specialization: Public Policy and Development *09.2020*

Ecole Polytechnique and ENSAE
M.Phil. Economics *09.2018*

Ecole Normale Supérieure de Cachan
B.Sc. Business and Economics *09.2016*

Job Market Paper

The Distributional Incidence of a Carbon Tax on Food

Food consumption accounts for around a quarter of households' total carbon footprints, comparable in magnitude to housing and transport. Food products differ widely in carbon intensity, creating scope to reduce emissions by changing the composition of food baskets. A carbon tax could induce such changes by increasing prices according to products' carbon content. Yet little is known about the incidence of such a tax across households. In this paper, I construct a novel dataset that combines granular household purchase data with product-level emission intensities. I show that food carbon footprints exhibit no clear income gradient (correlation $= -0.03$) and that high-emitting products, particularly red meat, are purchased by most households. I then study how households respond to price changes. Reduced-form estimates show that higher red-meat prices mainly reduce purchased quantities, with no detectable change in the probability of purchase. I estimate a structural demand system to account for substitution across food categories and find that red meat, the most carbon-intensive food category, is also the most price-elastic, and that households substitute toward less carbon-intensive categories when its price increases. Finally, I simulate carbon tax scenarios and show that a moderate tax rate (€44.6 per ton of CO_2e) leads to a substantial reduction in food emissions (8%). Uniform distribution of the tax revenues brings average net tax payments close to zero in every income decile.

Working Papers

The Gender Gap in Carbon Footprints: Determinants and Implications — *with Marion Leroutier*. Institute for Fiscal Studies Working Paper

More Than Food: The Effects of Food Intervention on Students Food Choices and Health Outcomes - *with Bénédicte Apouey, Simon Briole and Damien Mayaux*

Pre-registered trial at AEA registry: `https://doi.org/10.1257/rct.15529-1.3`

How Do Households Adjust Food Purchases to Fuel Price Shocks? Evidence from France — *with Fabrice Etilé*

Publications

Pipelines or Pyramids: Unequal Progress and Barriers for Women in Economics - *with Oliver Harman & Ninon Moreau-Kastler - Reviews of Economic Literature: https://rel.journals.sup.org/index.php/rel/article/view/10*

Work in Progress

Junk Food, Leisure, and Income Inequalities - *with Eve Colson-Sihra, Emmanuel Paroissien*

Food Carbon Footprints in India - *with Eve Colson-Sihra*

Non-Peer-Reviewed Publication

Inflation des prix alimentaires : quelles conséquences possibles pour les ménages modestes ? - *with Fabrice Etilé and Louis-Georges Soler - Cahiers de Nutrition et de Diététique: https://www.sciencedirect.com/science/article/abs/pii/S0007996023000329*

Grants, Scholarships, and Awards

London School of Economics (3,000 pounds)
Seed Money Grant *2026*
To study food carbon footprints in India.

Part of a research consortium (DynAPol-3P)
ANR Research Grant *2025 - 2030*
Funding obtained by Céline Bonnet.

Île-de-France Region (100,000 EUR)
Research Grant *2022 – 2025*
With Stéphane De Cara and Fabrice Etilé.

ADRES, Biosphera, Agricultural & Applied Economics Association
Travel Grants *2022 – 2023*

Ecole Normale Supérieure Paris-Saclay
PhD Scholarship *2020*
Three years full-time.

Ecole Normale Supérieure Paris-Saclay
Study Scholarship *2015*
Four years full-time.

University of Paris-Saclay
Best Paper Presentation Award *2023*

Conferences & Seminar Presentations

2026: ASSA 2026 Annual Meeting, Workshop on Environmental and Natural Resources Economics (CERGIC, Lyon), Grantham Research Institute Internal Seminar, Strasbourg Beta Lab External Seminar, World Inequality Lab Conference, CREST-ENSAE Internal Seminar, LSE GY500 Seminar, Sciences Po CRIS Symposium.

2025: Gender Inequality Workshop – London School of Economics; SEHO 2025 – Society of Economics of the Household; CEEM External Seminar Montpellier; Dijon External Seminar; TrEnCE Seminar, Université Paris-Dauphine; Grantham Research Institute Internal Seminar.

2024: PSAE – Internal Seminar; Institute of Fiscal Studies – Scanner Data Workshop; Stockholm School of Economics – Political Economy of the Environment Workshop; London School of Economics: Environmental Workshop; Paris School of Economics – Applied Seminar; EAERE – 29th Annual Conference; European Economic Association – Rotterdam.

2023: EAAE Congress; University of Paris Saclay Graduate School Days; Salon de l'Agriculture; 10th Annual Conference of the French Association of Environmental Economists; AFSE – 71st Congress; PSAE – Internal Seminar; Siegen University External Seminar; SMART UMR (INRAE) External Seminar.

2022: CEEM External PhD Seminar; Second World Inequality Database Conference – Paris School of Economics; Tenth IAERE Annual Conference; Augustin Cournot Doctoral Days; EAERE – 27th Annual Conference; 2022 AAEA Annual Meeting; EAAE PhD Workshop.

2021: JMA – 37th days of applied microeconomics; French Association of Environmental & Resources Economics; PSAE – Internal Seminar; FAERE – 8th Annual Conference.

Teaching

Graduate Level

Environmental and Resource Economics (Lecturer)
London School of Economics — *09.2025 – Current*

Economic Development and the Environment (Lecturer)
London School of Economics — *01.2026 – Current*

Sustainable Food Systems (Guest Teacher)
AgroParisTech — *02.2024*

Introduction to Environmental Economics (Teaching Assistant)
Sciences Po Paris (PSIA) — *2021 – 2023*

Undergraduate Level

Environmental Economics (Lecturer)
London School of Economics — *01.2025 – Current*

Macroeconomics (L3) (Teaching Assistant)
Ecole Normale Supérieure Paris-Saclay — *2021 – 2022*

Supervision

Master's Thesis Supervision
London School of Economics

Project in Applied Statistics (Postgraduate level)
ENSAE *2022 – 2023*

Professional Activities

Referee work

Food Policy; Environment and Resource Economics; Ecological Economics; International Economics; Science of the Total Environment

Administrative

Member of the Equity, Diversity and Inclusion Committee
London School of Economics *2026 –*

PhD Representative, Paris Saclay Applied Economics
University of Paris-Saclay *2022 – 2024*

Co-founder, Women in Econ Paris Saclay
2021 – Present

Contributing Blog Writer, World Bank and International Growth Center
2021 – Present

Previous Work Experience

Research Assistant for Prof. F. Etilé, Paris School of Economics *02.2020 – 09.2020*
World Bank Consultant, Mind, Behavior and Development Unit *08.2019 – 09.2019*
Research Assistant for Prof. M. Mahmud and K. Orkin, University of Oxford *09.2018 – 08.2019*

Languages & Technical Skills

Languages: French (Native), English (Fluent, C2), German (Beginner, A2).
Technical: Stata, Python, R, LaTeX.
