# Ondine **BERLAND** | Curriculum Vitae

Department of Geography and Environment
London School of Economics and Political Science
o.berland@lse.ac.uk • www.ondineberland.com • ORCID

Last updated: November 6, 2026

## Research Interests

**Topics**: Environmental Economics, Public Economics, Agricultural and Food Economics
**Methods**: Applied Econometrics, Randomized Control Trials, Machine Learning

## Positions

**LSE Fellow in Environmental Economics (Postdoctoral Scholar)**
*Department of Geography and Environment, London School of Economics* *01.2025 – Current*

**Affiliate**
*Grantham Research Institute* *01.2025 – Current*

## Education

**University of Paris-Saclay**
*Ph.D. in Economics, Research Unit: Paris-Saclay Applied Economics (PSAE), INRAE* *12.2024*
*Supervisor*: Stéphane De Cara (PSAE)
*Jury: Céline Bonnet (TSE), Jutta Roosen (TUM), Martin O'Connell (Wisconsin-Madison), José de Sousa (Paris-Assas)*

**Paris School of Economics**
*M.Sc. Applied Economics (Cum Laude), Specialization: Public Policy and Development* *09.2020*

**Ecole Polytechnique and ENSAE**
*M.Phil. Economics* *09.2018*

**Ecole Normale Supérieure de Cachan**
*B.Sc. Business and Economics* *09.2016*

## Research

### Job Market Paper

**Carbon Taxation of Food: Consumer Responses and Distributional Effects**

Food consumption accounts for a quarter of household carbon footprints, comparable in magnitude to housing and transport. Food products vary widely in carbon intensity, creating scope to reduce emissions by changing the composition of food baskets. A carbon tax could encourage such changes, but its effectiveness and incidence depend on what households purchase before the tax and how they adjust their purchases in response to higher prices. This paper combines granular household purchase data with product-level emission intensities to study these questions. The distribution of carbon footprints exhibits no clear income gradient (correlation $= -0.03$), and high-emitting products, particularly red meat, are purchased by most households. Reduced-form estimates show that higher red-meat prices mainly reduce purchased quantities, with no detectable change in the probability of purchase. Estimates from a structural demand system indicate that red meat is highly price-elastic, and that households substitute toward less carbon-intensive categories when its price increases. Simulations show that a carbon tax of €44.6 per ton of $CO_2$e reduces food emissions by 7.9%. Uniform redistribution of tax revenues brings average net tax payments close to zero in every income decile.

### Working Papers

**The Gender Gap in Carbon Footprints: Determinants and Implications** — *with Marion Leroutier*. Institute for Fiscal Studies Working Paper

**Media coverage:** The Guardian Der Spiegel France 24 Le Monde Libération France 2 JT (min 26) France Culture Alternatives Économiques Euronews

**More Than Food: The Effects of Food Intervention on Students Food Choices and Health Outcomes** - *with Bénédicte Apouey, Simon Briole and Damien Mayaux*

Pre-registered trial at AEA registry: `https://doi.org/10.1257/rct.15529-1.3`

**How Do Households Adjust Food Purchases to Fuel Price Shocks? Evidence from France** — *with Fabrice Etilé*

### Work in Progress

**Food Carbon Footprints in India** - *with Eve Colson-Sihra*

**Junk Food, Leisure, and Income Inequalities** - *with Eve Colson-Sihra, Emmanuel Paroissien*

### Publications

**Unequal Progress and Barriers for Women in Economics** - *with Oliver Harman & Ninon Moreau-Kastler - Reviews of Economic Literature:* `https://rel.journals.sup.org/index.php/rel/article/view/10`

### Non-Peer-Reviewed Publication

**Inflation des prix alimentaires : quelles conséquences possibles pour les ménages modestes ?** - *with Fabrice Etilé and Louis-Georges Soler - Cahiers de Nutrition et de Diététique:* `https://www.sciencedirect.com/science/article/abs/pii/S0007996023000329`

## Grants, Scholarships, and Awards

**London School of Economics (£3,000)**
*Seed Funding Grant* *2026*
To study food carbon footprints in India.

**DynAPol-3P research consortium (total funding: €3.94 million)**
*ANR Research Grant* *2025–2030*
Consortium member; funding secured by Céline Bonnet.

**Île-de-France Region (€100,000)**
*Research Grant* *2022–2025*
Jointly with Stéphane De Cara and Fabrice Etilé.

**ADRES, Biosphera, Agricultural & Applied Economics Association**
*Travel Grants* *2022–2023*

**École Normale Supérieure Paris-Saclay**
*PhD Scholarship* *2020*
Three years of full-time funding.

**École Normale Supérieure Paris-Saclay**
*Study Scholarship* *2015*
Four years of full-time funding.

**University of Paris-Saclay**
*Best Paper Presentation Award* *2023*

## Teaching

### Graduate Level

**Environmental and Resource Economics** (Lecturer)
*London School of Economics* *09.2025 – Current*

**Economic Development and the Environment** (Lecturer)
*London School of Economics* *01.2026 – Current*

**Sustainable Food Systems** (Guest Teacher)
*AgroParisTech* *02.2024*

**Introduction to Environmental Economics** (Teaching Assistant)
*Sciences Po Paris* (*PSIA*) *2021 – 2023*

### Undergraduate Level

**Environmental Economics** (Lecturer)
*London School of Economics* *01.2025 – Current*

**Macroeconomics (Third Year)** (Teaching Assistant)
*Ecole Normale Supérieure Paris-Saclay* *2021 – 2022*

### Supervision

**Third Year Undergrad and Master-level Dissertation Supervision**
*London School of Economics*

**Project in Applied Statistics** (Postgraduate level)
*ENSAE* *2022 – 2023*

## Professional Activities

### Referee work

Food Policy; Environment and Resource Economics; Ecological Economics; International Economics; Science of the Total Environment

### Administrative

**Member of the Equity, Diversity and Inclusion Committee**
*London School of Economics* *2026 –*

**PhD Representative, Paris Saclay Applied Economics**
*University of Paris-Saclay* *2022 – 2024*

**Co-founder, Women in Econ Paris Saclay**
*2021 – Present*

**Contributing Blog Writer, World Bank and International Growth Center**
*2021 – Present*

## Previous Work Experience

*Research Assistant for Prof. F. Etilé, Paris School of Economics* — *02.2020 – 09.2020*

*World Bank Consultant, Mind, Behavior and Development Unit* — *08.2019 – 09.2019*

*Research Assistant for Prof. M. Mahmud and K. Orkin, University of Oxford* — *09.2018 – 08.2019*

## Conferences & Seminar Presentations

**2026**: ASSA 2026 Annual Meeting, Workshop on Environmental and Natural Resources Economics (CERGIC, Lyon), Grantham Research Institute Internal Seminar, Strasbourg Beta Lab External Seminar, World Inequality Lab Conference, CREST-ENSAE Internal Seminar, LSE GY500 Seminar, Sciences Po CRIS Symposium.

**2025**: Gender Inequality Workshop – London School of Economics; SEHO 2025 – Society of Economics of the Household; CEEM External Seminar Montpellier; Dijon External Seminar; TrEnCE Seminar, Université Paris-Dauphine; Grantham Research Institute Internal Seminar.

**2024**: PSAE – Internal Seminar; Institute of Fiscal Studies – Scanner Data Workshop; Stockholm School of Economics – Political Economy of the Environment Workshop; London School of Economics: Environmental Workshop; Paris School of Economics – Applied Seminar; EAERE – 29th Annual Conference; European Economic Association – Rotterdam.

**2023**: EAAE Congress; University of Paris Saclay Graduate School Days; Salon de l'Agriculture; 10th Annual Conference of the French Association of Environmental Economists; AFSE – 71st Congress; PSAE – Internal Seminar; Siegen University External Seminar; SMART UMR (INRAE) External Seminar.

**2022**: CEEM External PhD Seminar; Second World Inequality Database Conference – Paris School of Economics; Tenth IAERE Annual Conference; Augustin Cournot Doctoral Days; EAERE – 27th Annual Conference; 2022 AAEA Annual Meeting; EAAE PhD Workshop.

**2021**: JMA – 37th days of applied microeconomics; French Association of Environmental & Resources Economics; PSAE – Internal Seminar; FAERE – 8th Annual Conference.

## Languages & Technical Skills

**Languages**: French (Native), English (Fluent, C2), German (Beginner, A2).

**Technical**: Stata, Python, R, LaTeX.
